Portfolio Website: https://simeon-portfolio-website.netlify.app/

Profile Summary

Final-year Software Engineering student with strong foundations in Python and backend development. Experienced in building data-driven applications, including an event-driven IoT monitoring platform using Python and Flask. Familiar with AI/ML concepts and API-based AI integrations, with a strong interest in developing intelligent systems.

Education

University of Stirling, Ras Al Khaimah, UAE
BSc (Hons) Software Engineering – Final Year | 2022 – 2026

United International Private School, UAE
Junior High School & Senior High School | 2016 – 2022

Trainings and Certifications

Cisco — Networking Basics | 2025
Udemy — Data Structures and Algorithms: Deep Dive Using Java | 2024
FreeCodeCamp — Responsive Web Design | 2024

Technical Skills

Programming Languages: Python, Java, JavaScript, TypeScript, SQL, NoSQL
Software Engineering Concepts: Data structures, algorithms, debugging, testing, API integration
Backend & Web Development: Flask, Node.js, Express, REST APIs, HTML, CSS
Data & Analytics: SQL, NoSQL basics, Excel, Power BI, data analysis
Tools & Technologies: Git, GitHub, Linux basics, Raspberry Pi systems, Microsoft Office
AI & Machine Learning: Basic understanding of machine learning concepts and experience working with AI APIs (OpenAI, Claude)

Projects

IoT Governance, Risk, and Compliance Monitoring System *(Final Year Project – Data Monitoring & Event Processing Platform)*
Developed an event-driven monitoring platform designed to process and analyze infrastructure security and environmental events from IoT sensors in real time.

- Built backend services using Python and Flask to collect, process, and log real-time data from connected IoT devices.
- Integrated Raspberry Pi sensors and camera modules to simulate monitoring of controlled infrastructure environments.
- Implemented rule-based event processing to detect anomalies and security violations from sensor data streams.
- Designed a web-based monitoring dashboard to visualize real-time sensor data, alerts, and system activity.
- Developed structured event logging and alert mechanisms to support automated incident detection and operational monitoring.

Technologies: Python, Flask, Raspberry Pi, REST APIs, HTML, CSS, JavaScript
GitHub: Repository private due to academic submission policy. Code available upon request.

Portfolio Website
Designed and developed a responsive portfolio website to showcase software engineering projects and technical work.

- Built interactive user interface components using HTML, CSS, and JavaScript.
- Implemented responsive design principles for cross-device compatibility.
- Deployed the website using Netlify with version control through GitHub.

Technologies: HTML, CSS, JavaScript, Netlify, GitHub
GitHub: https://github.com/simeonlavarias/PortfolioWebsite

AI Prompt Failure Analysis Dashboard
Developed a web application designed to log, analyze, and track failures in AI-generated responses to identify quality issues and patterns in model behavior.

- Built a full-stack application using TypeScript and Node.js to record AI prompts, responses, and detected failures.
- Implemented structured bug tracking and issue categorization to classify errors such as hallucinations, incorrect facts, and logic errors.
- Designed an analytics dashboard to visualize failure patterns, response accuracy, and common AI issues.
- Developed filtering and search tools to analyze edge cases and investigate problematic AI outputs.

Technologies: TypeScript, Node.js, Express, React, REST APIs
GitHub: Repository private due to academic submission policy. Code available upon request.

Work Experience

Software QA Tester *(Remote – Freelance)*
UserTesting | Global Platform *January 2026 – Present*

- Performed structured testing of web and mobile applications to identify functional issues and usability defects.
- Analyzed application workflows and reproduced system errors through systematic testing scenarios.
- Documented defects and technical findings through structured bug reports and recorded feedback.

IT Intern – Data Management & Support *(On-site)*
Greenhouse Foodstuff Trading LLC | Dubai, UAE *May 2025 – September 2025*

- Managed operational records using Laserfiche document management systems to improve accessibility and organization of company data.
- Verified cross-department records to ensure data accuracy and integrity for operational reporting.
- Provided IT troubleshooting support for office systems and enterprise software to maintain operational reliability.

Java Tutor *(Remote – Freelance)*
Preply | Global Platform *February 2024 – August 2024*

- Provided personalized Java programming instruction for beginner students.
- Explained programming concepts and debugging techniques to support student understanding.
- Provided constructive feedback and guidance to help learners improve programming skills.

Website Developer *(Remote)*
Content Cliff | Serilingampalli, Telangana, India *July 2023 – September 2023*

- Developed and maintained client websites using WordPress, HTML, CSS, and JavaScript.
- Implemented responsive layouts ensuring compatibility across desktop, tablet, and mobile devices.
- Optimized website performance and usability to improve system responsiveness and user experience.

Achievements

- My Stirling Award Gold with Green Leaf (2026)
- My Stirling Award Silver with Green Leaf (2025)
- My Stirling Award Bronze with Green Leaf (2025)
- Academic Representative of Computing Science Project (2025)
- Academic Representative of Mobile App Development Module (2025)
- Academic Representative of Introduction to Machine Learning Module (2024)
- Academic Representative of Introduction to Data Science Module (2023)
- Senior High School Academic Excellence – With High Honors (2022)
