

SIMEON CARLOS LAVARIAS

Software Engineering Graduate | First Class Honours | [CompTIA Security+ Certified](#)
simeonlavarias@gmail.com | +971 55 465 9304 | Dubai, UAE | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

First Class Honours Software Engineering graduate with hands-on experience building compliance-monitoring systems, evaluating system reliability, and applying security fundamentals across networking, development, and data handling. Practical background in Python development, structured technical documentation, and rule-based control logic — including a Final Year Project that ingests real-time data, applies compliance rules, and produces structured logs and reports. Has a strong grounding in security concepts, risk, and controls. Comfortable working across development, testing, and compliance-adjacent tasks, and communicating findings clearly to both technical and non-technical audiences.

TECHNICAL SKILLS

Security & Networking: CompTIA Security+ (SY0-701) · TCP/IP, DHCP, DNS · Wireshark Packet Analysis · Cisco Networking Basics · Risk & Controls Fundamentals · Event-Driven Alerting

Languages & Frameworks: Python · Java · JavaScript · SQL · Bash · Flask · Node.js/Express · REST APIs

Tooling & Data: Git/GitHub · Postman · Linux · Excel / Power BI · Structured Logging · Data Preprocessing

Compliance & Documentation: GRC Monitoring Concepts · Analytical Review of Records · Structured Technical Documentation · Internal Controls Awareness

WORK EXPERIENCE

Systems Developer Intern | Al Shirawi Equipment Co.

Sep 2026 – Present

Dubai Industrial City, UAE

- Working on resource and capacity planning systems, applying structured development practices to operational planning tools.

IT Intern – Data Management | Greenhouse Foodstuff Trading LLC

May – Sep 2025

Dubai, UAE

- Analysed cross-departmental records to identify data quality issues, applying structured investigation and analytical review to operational systems.
- Used Laserfiche DMS and SQL to organise and cross-check records, building familiarity with document control and data-integrity practices.

Java Tutor | Preply

Feb – Aug 2024

Global, Remote

- Taught programming logic, debugging strategies, and algorithmic thinking, reinforcing the technical foundation needed to understand and evaluate systems.

KEY PROJECTS

AI Audit Assistant

Python · Google Gemini API · REST — github.com/simeonlavarias/ai-audit-assistant

- Built a Python application that uses an LLM API to autonomously analyse policy and compliance documents, extract risks, and generate structured recommendations.
- Designed structured prompt schemas enforcing consistent, structured output suitable for downstream reporting and analytical review.
- Implemented secure API key management via environment variables, reflecting safe-handling practices for sensitive data.

GRSee — IoT Compliance Monitoring System

Python · Flask · MQTT · REST APIs · Raspberry Pi — Final Year Honours Project

- Designed an event-driven backend to ingest real-time IoT sensor streams, apply rule-based compliance logic, and trigger automated alerts on control violations.
- Produced structured audit logs and compliance reports mapped to ISO 27001 and PCI DSS, applying documentation discipline relevant to security and compliance fieldwork.

EDUCATION

BSc (Hons) Software Engineering — First Class Honours

University of Stirling | 2022 – 2026

First Class Honours is the highest degree classification in the UK university system (approx. equivalent to a 3.8–4.0 GPA). Degree attestation currently in process.

Relevant modules: Software Engineering · Data Structures & Algorithms · Machine Learning · Data Science · Computer Networks

CERTIFICATIONS & AWARDS

- CompTIA Security+ (SY0-701) — 2026 · Cisco — Networking Basics (2025) · Udemy — DSA: Deep Dive Using Java (2024)
- RAK Excellence Award Finalist, AURAK (2026) · Stirling Award — Bronze, Silver & Gold with Green Leaf (2025–2026)
- Academic Representative — CS Project, Mobile App Dev, Machine Learning, Data Science (2023–2026)
