Simeon Carlos Lavarias

Software Engineering Graduate | AI & Data Solutions | Python
✉ simeonlavarias@gmail.com | ☎ +971 55 465 9304
GitHub | LinkedIn | Portfolio Website

SKILLS

Programming: Python, JavaScript, Java, C
AI & Automation: Large Language Models (ChatGPT, Claude), Prompt Engineering, AI-assisted workflows, LLM-based automation
Data & Systems: REST APIs, client-server architecture, data processing, structured logging, debugging
Tools & Technologies: Flask, Node.js, Express, Git, Postman, Selenium, Linux, Raspberry Pi
Databases: SQL, NoSQL
Testing & Validation: Manual testing, test case design, bug tracking, system validation
Analytics & Reporting: Excel, Power BI

WORK EXPERIENCE

UserTesting | Global Platform (Remote) *Jan 2026 – Present*
Software QA Tester

- Executed structured manual testing across web and mobile applications to identify functional and usability defects
- Designed and followed test scenarios to validate application workflows and edge cases
- Documented bugs through clear, structured reports, including reproduction steps and expected vs actual results
- Evaluated system outputs for accuracy and usability, similar to validating AI-generated results and workflows

Greenhouse Foodstuff Trading LLC | Dubai, UAE *May 2025 – Sep 2025*
IT Intern – Data Management & Support

- Verified cross-department records to ensure data accuracy and system consistency, supporting operational reliability
- Assisted in troubleshooting IT systems, strengthening debugging and problem-solving skills
- Managed enterprise records using Laserfiche, improving data accessibility and organization

Preply | Global Platform (Remote) *Feb 2024 – Aug 2024*
Java Tutor

- Explained programming concepts and debugging techniques, strengthening logical thinking and code analysis skills

Content Cliff | Serilingampalli, India (Remote) *Jul 2023 – Sep 2023*
Website Developer

- Developed responsive websites using HTML, CSS, and JavaScript, ensuring cross-browser compatibility and usability

EDUCATION

University of Stirling, Ras Al Khaimah, UAE *2022 – 2026*
BSc (Hons) Software Engineering – Final Year (Expected 2026)
Expected First Class Honours
Relevant Coursework: Software Engineering, Data Structures & Algorithms, Mobile App Development, Machine Learning, Data Science, Computer Networks

AI & LLM EXPERIENCE

- Applied large language models (ChatGPT, Claude) for structured problem-solving and real-world technical workflows beyond casual use
- Designed and refined prompts to improve output accuracy, consistency, and reliability
- Explored AI-assisted automation for summarization, analysis, and structured output generation
- Experimented with LLM-based workflows to support decision-making and process optimisation

PROJECT WORK

IoT Governance, Risk, and Compliance Monitoring System ***(Final Year Project)***

- Built an event-driven monitoring system using Python and Flask to process real-time IoT sensor data
- Designed a rule-based engine to detect anomalies and map events to compliance and risk conditions
- Developed structured logging and analysis features, simulating audit-style monitoring and validation workflows
- Created dashboards to visualize system behaviour and support risk-aware decision-making

Technologies: Python, Flask, Raspberry Pi, REST APIs, HTML, CSS, JavaScript
GitHub: Repository private due to academic submission policy. Code available upon request.

AI Prompt Failure Analysis Dashboard

- Built a full-stack system to track and analyse failures in AI-generated outputs
- Designed structured classification of errors to improve system reliability and output quality
- Implemented analytics dashboards to identify patterns and support optimisation of AI workflows

Technologies: Node.js, Express.js, REST API, JavaScript, HTML, CSS
GitHub: https://github.com/simeonlavarias/ai-bug-tracker

AI Audit Assistant

- Built a terminal-based Python application that uses an LLM API to analyse audit notes, policy documents, and process descriptions for decision support
- Designed structured prompts to extract summaries, identify key risks, and generate actionable recommendations from unstructured text
- Implemented secure API key management using environment variables and .env configuration

Technologies: Python, Google Gemini API, python-dotenv
GitHub: https://github.com/simeonlavarias/ai-audit-assistant

Portfolio Website

- Designed and deployed a responsive portfolio site to showcase software engineering projects and technical work

Technologies: HTML, CSS, JavaScript, Netlify
GitHub: https://github.com/simeonlavarias/PortfolioWebsite

AWARDS & CERTIFICATIONS

- **Stirling Award** — Bronze, Silver & Gold with Green Leaf (2025–2026)
- **Academic Representative** — Computing Science Project, Mobile App Development, Introduction to Machine Learning, Introduction to Data Science (2023–2026)
- **Cisco** — Networking Basics (2025)
- **Udemy** — Data Structures and Algorithms: Deep Dive Using Java (2024)
- **FreeCodeCamp** — Responsive Web Design (2024)
- **Senior High School Academic Excellence** — With High Honors (2022)
