

SIMEON CARLOS LAVARIAS

Software Engineering Graduate | First Class Honours | [CompTIA Security+ Certified](#)
simeonlavarias@gmail.com | +971 55 465 9304 | Dubai, UAE | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

First Class Honours Software Engineering graduate with hands-on experience building compliance-monitoring systems and applying security fundamentals across networking, development, and data handling. Final Year Project mapped real-time IoT sensor data to ISO 27001 and PCI DSS controls, producing automated alerts and audit-ready logs. CompTIA Security+ certified with a working grounding in risk, controls, and GRC concepts. Comfortable moving between development, testing, and compliance-adjacent work, and explaining technical findings to non-technical audiences.

TECHNICAL SKILLS

- **Security & Networking:** CompTIA Security+ (SY0-701) · TCP/IP, DHCP, DNS · Wireshark Packet Analysis · Cisco Networking Basics · Risk & Controls Fundamentals · Event-Driven Alerting
- **Languages & Frameworks:** Python · Java · JavaScript · SQL · Bash · Flask · Node.js/Express · REST APIs
- **Tooling & Data:** Git/GitHub · Postman · Linux · Excel / Power BI · Log Analysis · Data Preprocessing
- **Compliance & Documentation:** GRC Monitoring Concepts · Records & Controls Review · Technical Documentation · Internal Controls Awareness

WORK EXPERIENCE

Systems Developer Intern

Al Shirawi Equipment Co.

Sep 2026 – Present

Dubai Industrial City, UAE

- Supporting resource and capacity planning systems, applying development practices learned during the degree to live operational tooling.

IT Intern – Data Management

Greenhouse Foodstuff Trading LLC

May – Sep 2025

Dubai, UAE

- Reviewed records across departments to identify data quality issues, applying a consistent investigation method to operational systems.
- Used Laserfiche DMS and SQL to organise and cross-check records, building familiarity with document control and data-integrity practices.

Java Tutor

Preply

Feb – Aug 2024

Global, Remote

- Taught programming logic and debugging strategies to students remotely, strengthening the ability to break down and explain technical systems clearly.

KEY PROJECTS

AI Audit Assistant

Python · Google Gemini API · REST — github.com/simeonlavarias/ai-audit-assistant

- Built a Python application that uses an LLM API to analyse policy and compliance documents, extract risks, and generate recommendations.
- Designed prompt schemas that enforce a consistent output format suitable for downstream reporting and review.
- Implemented secure API key management via environment variables, reflecting safe handling of sensitive credentials.

GRSee — IoT Compliance Monitoring System

Python · Flask · MQTT · REST APIs · Raspberry Pi — Final Year Honours Project

- Designed an event-driven backend to ingest real-time IoT sensor streams, apply rule-based compliance logic, and trigger automated alerts on control violations.
- Produced audit logs and compliance reports mapped to ISO 27001 and PCI DSS, reflecting documentation practices relevant to security and compliance fieldwork.

EDUCATION

BSc (Hons) Software Engineering — First Class Honours

University of Stirling

2022 – 2026

First Class Honours — the highest UK degree classification ($\approx$ 3.8–4.0 GPA equivalent). Degree attestation in process.

Relevant modules: Software Engineering · Data Structures & Algorithms · Machine Learning · Data Science · Computer Networks

CERTIFICATIONS & AWARDS

- [CompTIA Security+ \(SY0-701\)](#) — 2026 · Cisco — Networking Basics (2025) · Udemy — DSA: Deep Dive Using Java (2024)
- RAK Excellence Award Finalist, AURAK (2026) · Stirling Award — Bronze, Silver & Gold with Green Leaf (2025–2026)
- Academic Representative — CS Project, Mobile App Dev, Machine Learning, Data Science (2023–2026)
